## **DESIGN YOUR VERY OWN COMIC COMPUTER GAME**

This creative workshop invites the kids to learn more about the designing of computer games – i.e. from the primary idea up to the whole story told by the very computer game. On paper, the kids will create the tale on their very own „gaming level“ and tell it through comic-like speech bubbles. While creating it, the kids can exploit knowledge from virtually all and any subjects at school - maybe even physical education... The workshop is held during an exhibition dedicated to the "Creaks"-computer game. In this way, the kids may get inspired by "pareidolia", a psychological phenomenon sparking the creation of the game, causing that some people see random pictures as something different and significant.

### TRESKY PLESKY - Slashes and bangs

Set out for an adventurous journey in the foot-steps of the reporter Kata Strofová at the exhibition Tresky plesky (Slashes and bangs). Explore natural phenomena as e.g. a volcano, lightning, tsunami or an avalanche. Meet monkeys as well as a huge whale or come for some skiing with us in the city centre of Bratislava.

This exhibition is based on the well-known Slovak cartoon-series Tresky Plesky. The visitors will get the feeling of entering a unique fantasy-world of natural phenomena — experiencing the adventures of the individual parts in the most realistic way.

This event also introduces some animals from the series along with their "problems" in a 3D-form. The kids may hoot on an elephant-trunk, they can walk in „horse-shoes“ as a foal, collect bread-sticks with a crocodile mouth, sit on looooooong dachshund-shaped bench, they will experience a zebra with entangles stripes, a peacock loving theatre, they will perform like an octopus needing help with baking and like ants carrying leaves into their anthill.

## **CREAKS – ART IN GAME**

Computer gamers will be definitely pleased by the Creaks-exhibition. This modern exhibition is dedicated to the cartoon-focused Amanita Design graphics studio (this workshop produced such plays as Samorost (Root-Wood-Sculpture), Rocketman, Machinárium or Botanicula) and their new adventure game called Creaks. Through the work of the visual artist Radim Jurda and the game-developer Jan Chlup - the kids will see with their very own eyes, how the hand-drawn and hand-painted video-game Creaks gradually came into existence. They will see the original sketches from its early development stages, paintings and drawings later appearing in the game (in their digitally edited form), or also materials, which did not make it to the game. In this exhibition, the visitors can even play that game and compare the appearance of the final digital version with the hand-made originals.

*Theme – T. Danay; author – R. Jurda and J. Chlup – Amanita Design; dramaturgy – Von Dubravay; design-space-solution and technical solution – Von Dubravay*
